

Procedure for manually adding internet radio stations

There are two methods to manually add internet radio stations, you can use the EC Play app or use the web interface. The latter is in most cases the easiest, as it's easier to copy and paste using a computer. Search the WEB for stream URLs (addresses) and logos.

Finding stream URLs

If you don't already have the stream URL you can find most stations here: <u>www.radio-browser.info</u> Use the search field in the top right corner:

After pressing "Add" you will now see the station in the list. You can edit by pressing the 3 small dots on the left, if needed.

Consider adding the station(s) as a Favorite, as the favorites are more easily accessible in the app and web interface.

For Tana and Rena: The radio stations can be designated to any of the 3 favorite buttons on the remote control (for those who have this), in addition to 1 favorite that can be started by touching the On/Off button on the top of

Using the Web Interface:

- First enter the IP address of you Electrocompaniet speaker/streamer in the address bar.
 You can find the IP address in the network section of the EC Play app
- Then navigate to the Internet radio section.
- In this section click "NEW CUSTOM RADIO".
- Enter the details and press "OK".
